

EVERETTBROOKES

Dear Tania

From the first moment you described the DNA system to David and myself I knew that I wanted it installed in our shop. After the recent spate of jewellery store armed holdups in South Australia I, like many other jewellers, was a little on edge. As I am looking at employing staff soon I am keen to offer a safe working environment, I believe that your system will deter theft therefore keeping my family and employees as safe as possible.

As we have our system covering the only two access points as well as several remote activators, a cashdrawer activator and wired to our panic button we feel we have the best possible deterrent available to us at the moment.

Thankyou for organising before hours installation and offering excellent support during and after setup. We really found the whole experience quite painless and well priced too.

Let's hope we never find out how well the system works!

Kind regards,

Ian Brookes
