“To The Business Owner/Manager”

The main reason we chose the DNA Security Solution was to protect the integrity and safety of our staff. Our Human Resources are the most important and respected element of our Business.

Since installing the system we have the right to boast we are being pro-active in the area of protecting our assets and this has given a positive vibe to our staff and members

We strongly encourage any business that has cash or high target products on their premises to install DNA Guardian to deter the criminal element and to protect your staff and family.

We have been very impressed with the outstanding levels of service and follow up that we have experienced for the past 12 months, and look forward to continuing with the positive results we have achieved from having DNA Guardian installed.

Yours sincerely

Mark Perkins
Club Manager
